LeetCode

Education

Delhi Technological University

B.Tech in Computer Science and Engineering; CGPA: 9.06/10

New Delhi, India

2024 – 2028

Kendriya Vidyalaya AGCR

CBSE Class XII: 95% — Class X: 96%

New Delhi, India

2021 – 2023

Experience

Software Development Intern

Delhi Metro Rail Corporation (DMRC)

May 2025 – Jul. 2025

New Delhi, India

- Contributed to web-based modules for a Human Resource Management System (HRMS), working across responsive frontend components and backend service integration.
- Assisted in developing AI-enabled features for workflow automation and employee-management applications.
- Debugged, tested, and refined application functionality within an existing codebase, collaborating with mentors to identify issues and integrate reliable functionality.

Projects

AI Shopping Agent — *Python, LangChain/LangGraph, Groq, SQLite, Streamlit*

GitHub

- Built an agentic conversational shopping assistant in **Python** using LLM-driven tool calling for product search, preference management, review aggregation, order history, and checkout workflows.
- Implemented deterministic Python tools over SQLite for product filtering, ratings, preferences, and order operations, separating application logic from LLM orchestration.
- Designed modular components for tool execution and database operations to improve **maintainability and reliability**.
- Built a dual-layer **evaluation and testing suite** with multi-turn tool-call accuracy checks and LLM-as-a-Judge evaluation for response formatting and guardrail compliance.

tasteMate — *React Native, Expo, TypeScript, Clerk, Convex, Zustand*

GitHub

- Developed a cross-platform recipe discovery application with category filtering, search, authenticated saved collections, and profile management using Expo Router.
- Integrated Clerk authentication with Convex queries and mutations to persist user-specific saved recipes and maintain backend-driven application state.
- Implemented resilient saved-recipe management with image fallback, single-item deletion, and long-press multi-select batch deletion.

Achievements

- Solved 800+ problems on LeetCode; achieved a contest rating of 1754, placing in the Top 10.2% globally.
- Achieved a maximum Codeforces rating of 1316 (Pupil) through regular participation in rated contests.
- District-level Badminton Player.

Technical Skills

Languages: Python, C++, C#, Java, JavaScript, TypeScript, SQL

Software Development: Object-Oriented Programming, Software Testing, Debugging, Data Structures & Algorithms

Frameworks/Libraries: React, React Native, Expo, Node.js, Express.js, LangChain, LangGraph, Streamlit

Databases/Tools: SQLite, MongoDB, MySQL, Convex, Firebase, Git
